In his Chamber

The right orthopedic care can make a big difference in terms of maintaining or recapturing the quality of life. From Joint Replacement to Sports Medicine, Treatment of Osteoporosis or Fractures and much more, Apollo Hospitals, Bhubaneshwar does it all.

This centre is at the forefront in providing the latest in orthopedic treatments and surgical techniques. The centre performs surgical procedures which include the most current Arthroscopic and Reconstructive techniques including major Joint Replacements, Arthroscopies, Spine surgeries, the most delicate Hand surgeries and much more.

Key Hole Surgery

Arthroscopic or keyhole surgeries of the joints are routinely performed. The most common Arthroscopic procedures include Repairing Cartilage and Meniscal problems in the Knee, reconstructing the ligaments in the Knee and stabilizing the joint, repairing Rotator Cuff tears in the Shoulder

Joint Replacements

Total hip replacement Resurfacing Hip Replacement Total knee replacement Total shoulder replacement Total elbow replacement Wrist replacement Hand joint (small) replacement surgery Ankle joint replacement

Ilizarov and External Fixation Device

Management of open fractures infected non-union of long bones Limb lengthening Correction of deformities Fusion of joints

Arthritis

Osteoarthritis Rheumatoid arthritis Infective arthritis Traumatic arthritis

Arthroscopic Surgery

Key hole surgery for disorders of the knee, shoulder, elbow and ankle

Trauma and Fracture Surgery

High quality Swiss AO' systems, help stabilize fractures Image intensifier, confirms perfect fracture fixations

Spinal Surgery

Disc surgery Micro surgery for disc Fixation systems for fractures Surgery for correction of spinal deformities Surgery for tuberculosis of spine Endoscopic spine surgery

Podiatric Orthopedics

Congenital limb and spinal deformities Bone and joint infections Juvenile arthritis

Minimally Invasive Orthopedic Surgery

The Orthopedic surgeons at the Apollo Hospitals can diagnose and treat many types of bone and joint problems using minimally invasive techniques. Most minimally invasive orthopedic surgeries are done with the use of an arthroscopy, a special thin tool designed for viewing and treating problems inside a joint. The arthroscopy is so slim that it can be inserted into the joint through one or more tiny "keyhole" cuts. Specially designed instruments are used to do appropriate Surgeries. Recovery is faster due to less tissue trauma.

Resurfacing arthroplasty of the hip

Apollo has pioneered this procedure in India and now it is available in Bhubaneswar.

The Knee Clinic

It caters to patients having pain and instability resulting from injuries or diseases of the joint. Latest surgical reconstruction and non surgical techniques are used for complete care of the knee joint in all age groups.

Apollo Sports Medicine

Apollo Sports Medicine covers every aspect of treatment for sports injuries, all of which have one focus, getting a sports man back on track as soon as possible.
